OBJECTIVE

Electronics and Telecommunication (EnTC) student (SGPA 9.32) with hands-on experience in embedded systems, microcontroller-based design, and IoT prototyping using ESP32, Arduino, and PCB design in KiCad. Strong fundamentals in digital electronics, circuit design, and hardware debugging, with practical exposure to sensor interfacing, motor control, and embedded C programming. Seeking an Embedded Systems & IoT Internship to contribute to real-world firmware development, hardware validation, and product design under experienced engineering mentorship.

EDUCATION

B.E. Electronics & Telecommunication

Expected May 2027

International Institute of Information Technology (I²IT), Pune — SGPA: 9.32

TECHNICAL SKILLS

Microcontrollers & Hardware: ESP32, Arduino, sensors, relay modules, DC motors, buck converters, power management circuits

Embedded Programming: C, Embedded C, Arduino IDE, basic Verilog HDL/RTL modelling

Communication & IoT: Blynk IoT platform, remote device control, sensor-to-cloud data flow, basic UART/I2C interfacing

Design & Simulation Tools: KiCad (PCB design & schematic capture), Proteus (circuit simulation), Arduino IDE

Core Concepts: Digital electronics, circuit design, PCB layout, schematic reading, hardware debugging and validation, embedded systems architecture, troubleshooting electronic circuits

EXPERIENCE

Intern — Claidroid

Jul 2025 – Aug 2025

- Contributed to development and debugging of application features as part of a cross-functional engineering team, gaining hands-on exposure to structured development workflows
- Collaborated with team members to implement, test, and refine functionality, applying systematic troubleshooting and validation practices
- Documented development activities and progress, building familiarity with real-world product development and reporting practices

Campus Ambassador — Google Gemini

Jul 2025 – Dec 2025

- Represented Google initiatives on campus, promoting developer programmes and technology-focused events to the student community
- Organised and promoted technical workshops and community engagement sessions, coordinating with peers to drive participation in hands-on learning opportunities

PROJECTS

Wall Painting Robot — ESP32-Based Embedded System | ESP32, Arduino, Blynk IoT, Dabble, Relay Modules, Buck Converter

- Designed and developed an ESP32-based wall painting robot, integrating relay modules, motor control circuits, and power management using a buck converter for stable voltage regulation
- Implemented IoT-based remote control using the Blynk platform, enabling real-time operation and monitoring of hardware from a mobile interface
- Worked through the complete hardware development lifecycle — schematic design, component integration, firmware programming, and on-device testing

Smart Public Distribution (Ration) System | ESP32, Embedded Systems, IoT (*Ongoing*)

- Building an IoT-enabled automated ration distribution prototype using ESP32, RFID authentication, and servo-controlled dispensing mechanisms.
- Implementing secure beneficiary verification and automated grain allocation to minimize manual intervention and fraud.
- Developing a scalable monitoring framework with real-time status updates, transaction tracking, and accountability features for public distribution systems.

HACKATHONS & CERTIFICATIONS

FOSSEE OSHW Hackathon — IIT Bombay | 2026

- Participated in an open-source hardware hackathon focused on real-world problem solving in embedded and IoT applications
- Worked on hardware design, component integration, and prototyping concepts under time-constrained, collaborative conditions

VLSI SoC Design using Verilog HDL (Received a 50% Scholarship on the entire course through the qualifying test)

Arduino Training Certificate — Spoken Tutorial(IIT Bombay)| 2025

AWS Academy Cloud Foundations — AICTE × Amazon Web Services | 2026

Networking & Cybersecurity Fundamentals | Cisco Virtual Internship | 2025

IBM SkillBuild Certification | [AI Fundamentals] | IBM | 2026

LEADERSHIP & COMMITTEES

- IEEE Co-Chair — I²IT Pune (2025 – Present)
- Lady Representative — I²IT ACM Committee (2025 – Present)

INTERESTS

Charcoal sketching (artwork showcased on Instagram)

- ◆ Self-learning Spanish (A2)
- ◆ Building and tinkering with hobby electronics projects
