OBJECTIVE

Final-year Electronics & Telecommunication engineering student (SGPA 9.32) with hands-on experience shipping full-stack features, testing and evaluating AI model outputs, and translating ambiguous problems into working products. Seeking a Product Intern role at Outmarket AI to combine strong technical fluency with product instincts — writing specs, running user research, and helping ship AI-native workflow tools for commercial insurance.

EDUCATION

B.E. Electronics & Telecommunication

Expected May 2027

International Institute of Information Technology (I²IT), Pune — SGPA: 9.32

PRODUCT & TECHNICAL SKILLS

Product: User research & synthesis, feature specs & requirements docs, user testing & feedback loops, prioritization, data-informed decision-making, cross-functional collaboration with engineering & design

Technical Fluency: Java, JavaScript, Node.js/Express, REST API design, MySQL, MongoDB, AWS (S3, IAM), Git, Postman, AI/ML fundamentals

Tools: Postman, Git/GitHub, VS Code, IntelliJ IDEA

EXPERIENCE

SDE Intern — Claidroid, Mumbai

Mar – Apr 2026

- Scoped and built a cloud storage dashboard end-to-end from a business requirement, shipping a REST API (AWS S3 + Node/Express) supporting upload, retrieval, and deletion
- Tested every endpoint in Postman across core user flows, iterating on error handling and edge cases based on results
- Worked independently to prioritize features within a fixed timeline, balancing scope against reliability

R&D Intern — PPCRC

Jul – Aug 2025

- Ran structured evaluations of Qwen AI's outputs against curated video/image datasets, documenting model errors and edge-case failures for the research team — early hands-on experience assessing AI product quality
- Synthesized findings into a shared error taxonomy that informed the team's next iteration

GSSoC Contributor — GirlScript Summer of Code

Aug – Oct 2025

- Built a dark/light theme toggle for DSARecommender based on user-facing feedback, and authored README documentation for InfantCareCompass to make onboarding clearer for new users
- Mentored incoming contributors on ZBOT and reviewed early pull requests — practice explaining product and technical decisions to a broader audience

Campus Ambassador — Google Gemini

Jul – Dec 2025

- Represented Google's developer programs on campus, organizing workshops that drove measurable turnout and engagement
- Communicated technical concepts to non-technical audiences and gathered peer feedback to shape future event formats

PROJECTS

EnvVault — Full-Stack Secrets Management Platform | *React, Node.js, Express.js, MongoDB Atlas*

- Identified a real workflow pain point (scattered per-project .env files) and scoped a full-stack solution centralizing environment variables across projects
- Designed and tested import/export and secret hide/reveal flows across 2 sample projects and 13 variables, iterating based on usability issues found in testing

ZBOT — Voice-Activated AI Assistant | *Python, OpenAI/Transformers, PyQt5, Speech Recognition*

- Defined product scope for a Jarvis-style assistant spanning voice commands, web search, and system automation, then broke it into a multi-threaded architecture to meet responsiveness goals
- Added persistent memory across sessions after observing users repeat themselves in early testing

Automated WhatsApp Messaging System | *Java, Twilio API*

- Built a workflow-automation tool for business messaging, scoping requirements around contact lists, dynamic templates, and delivery reliability

HACKATHONS & AI CASE STUDIES

Smart India Hackathon — MHRD / Government of India (2024 – 2025)

- Floatchat (2025): Contributed to an AI chatbot interpreting structured oceanic datasets, translating complex data into clear answers for user queries
- VerdictVision (2024): Scoped a structured legal case database with outcome-probability logic for commercial dispute resolution — vertical workflow software for a regulated industry; shortlisted at college level

WWT All India Women's Hackathon — Certification (2025)

- Built an AI-driven analytics system for rural women's financial literacy, structuring raw data into simplified, actionable insights for non-expert users

CERTIFICATIONS

- IBM SkillBuild — AI Fundamentals & Build an AI Agent | IBM (2026)
- AWS Academy Cloud Foundations — AICTE × Amazon Web Services (2026)
- Networking & Cybersecurity Fundamentals — Cisco Virtual Internship (2025)
- Claude Code in Action | Anthropic (2026)

LEADERSHIP & INTERESTS

- IEEE Co-Chair — I²IT Pune (2025 – Present) | Lady Representative — I²IT ACM Committee (2025 – Present)
- Charcoal sketching, self-learning Spanish (A2), open-source & community-driven projects
